***Additional Overall Comments, Criticisms, Compliments and Suggestions (What can we do to improve our programs?)***

## **Reviews about the Program**

*“Excellent and able to take a lot of complicated information and make it very engaging and digestible.”*

*“Excellent. My favorite part might have been when he role played with the one participant. This illustration was very effective. One more example of clinical application in this manner would have been wonderful.”*

*“Excellent presentation. My only slightly negative comment is that on day 2 he stopped every 5 minutes for questions. That got a little annoying, as I really wanted to hear HIM - and some things in the handout didn't get as much attention. But overall, a fantastic presentation.”*

*“Excellent- There was a nice balance of research, clinical experience, anecdotal examples and audience interaction. I would highly recommend his workshops without hesitation.”*

## **Reviews about the Speaker**

*“Dr. Rudd's presentation provided information and training that were very helpful, practical, and the result of current research. The information was new and startling in many ways, especially in dismantling previous assumptions about practices and beliefs in the face of suicide. Excellent presentation! I hope to share with partners.”*

*“Exceptional In many ways: presentation material, vocal tone and timing, responsive to audience questions, empathic clinician.”*

*“Dr. Rudd's presentation was a great experience and very helpful with regard to my work and above. He was one of the few people who responded in an optimal way to remarks and questions from the audience and - used the microphone -. Many thanks.!”*

*“The seminar was very informative and well paced. His presentation style kept the material interesting with case examples and questions from the audience.”*

*Dr. Rudd was very knowledgeable and responsive. His presentation style was effective and engaging. I wish his handouts matched the slides he was showing a bit better on the second day or he would note that the slide was not in the handout so I wouldn't spend so much time searching for it and losing focus doing so.”*
